

Energy industry

Turbine cleaning

Reactor cleaning

Process pumps

Application examples, cleaning and other tasks

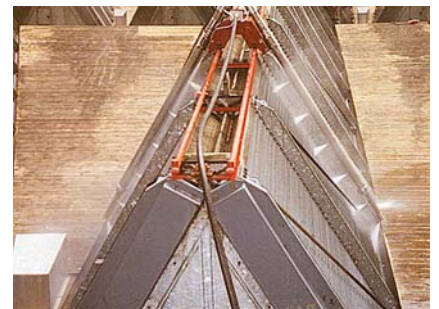

- Internal and external cleaning of cooling towers
- Cleaning drains, pipe lines, ash water lines, exhaust gas pipes
- Cleaning heat exchangers, condensers, coolers
- Cleaning coal bunkers, settling and sediment basins, oil tanks, smoke stacks
- Cleaning boilers and boiler tubes
- Cleaning and stripping flue gas lines, flue gas washers, flue gas de-sulphurizing plant
- Cleaning machine shops, workshops, production and transportation equipment
- Cleaning air and water filter units, conveyors, conveyor belts
- Decontamination of tanks, pipes and machinery
- Coating removal from concrete and metal structures
- Decommissioning
- Reactor cleaning

Application examples for process pumps

- Boiler feed pumps for small power plants and garbage incinerator plants

Cooling tower internal cleaning

Decontaminating coolers

Decontaminating coiled tubing
